

PROTECT YOUR CARPET INVESTMENT ABOVE AND BELOW THE SURFACE

Carpet cushion really is that important.

The cushion installed under a carpet actually absorbs the shock of foot traffic, so the force exerted on your carpet is reduced by half. That will not only make your carpet more comfortable, but will help it wear much better. We recommend STAINMASTER® carpet cushion, which will actually extend your warranty when installed with a STAINMASTER®-carpet.

Spills are easier to clean up – making it hard for stains to form.

Only STAINMASTER® carpet cushion has the DuPont™ Hytrel® breathable moisture barrier. This impermeable top layer keeps spills above the cushion where they can be thoroughly cleaned, preventing recurring stains and destroying odors.

Mold and mildew don't stand a chance.

The DuPont™ Hytrel® breathable moisture barrier makes STAINMASTER® carpet cushion the only one that allows moisture vapor, which is naturally emitted from floors, to pass through the cushion and evaporate, protecting the cushion from mold and mildew formation.

Because STAINMASTER® carpet cushion makes your carpet easier to maintain, your carpet will look newer, longer.
